

Sezgin Aslantaş

Frontend Developer

Work Experience

Frontend Developer

BiggPlus (Aristo)

(February 2023 to Now)

Currently, I am employed at Biggplus, where I am responsible for the frontend development of the Club projects used by companies to reward their employees. In this role, my primary focus is designing a user-friendly and impressive user interface to provide employees with an enjoyable experience and enhance their motivation.

Projects: daikinpod.com, airfelplus.com

Technologies Used: Html5, Css3, Javascript, React, Redux, React Bootstrap, Tailwind, Blazor

Web Developer

BRT

(April 2022 to February 2023)

I have developed the frontend and backend coding for the websites of the company I work for. I have also developed the frontend for an ERP project that encompasses all the operations that employees can utilize.

Projects: barutgroup.com.tr, yonetim.sermedhavuz.com

Technologies Used: Html5, Css3, Bootstrap, Javascript JQuery, PHP, Angular

Junior Frontend Developer

Global Medya

(February 2021 to March 2022)

I worked at a global media agency where I designed and coded the frontend of numerous corporate websites for various companies.

Projects: <https://www.makrosertekstil.com/>,
<https://www.ekemuhendislik.com/>

Technologies Used: Html5, Css3, Bootstrap, Javascript, JQuery

About Me

I am a 22-year-old software developer with 2.5 years of experience. Throughout my career, I have had the opportunity to work as both a full-stack developer and a frontend developer.

Currently, I am employed at Biggplus, where I am responsible for the frontend development of the Club projects used by companies to reward their employees. In this role, my primary focus is designing a user-friendly and impressive user interface to provide employees with an enjoyable experience and enhance their motivation.

Thanks to my wide range of technical skills, I am capable of actively participating in all stages of projects. I have expertise in both frontend and backend technologies and can comfortably work with various programming languages such as Html5, Css3, JavaScript, JQuery, Php, React, Redux, Next, Tailwind and React Bootstrap. Additionally, I have experience in database and web application management .

My creative and analytical thinking skills, problem-solving abilities, and inclination towards teamwork enable me to work successfully on complex projects. I value collaboration and strive to maintain effective communication with team members.

I am dedicated to continuously improving myself and remaining open to new technologies and trends. I aim to deliver high-quality and sustainable solutions in every project.

Education History

Web Design
